

THE 2.5 GHz ENG BAND (2500 - 2690 MHz) ASSIGNMENT RESTRICTIONS

TOB Network Licences: (7)=Seven Network, (9)=Nine Network, (10)=Ten Network, (ABC)=ABC Network.

ASSIGNMENT INSTRUCTIONS

This band is no longer available for apparatus licensing as the band has been spectrum licenced. See Embargo 26. The text below has been retained for historical reference only.

This band is identified primarily for use by Television Outside Broadcast (TOB) services particularly Electronic News Gathering (ENG) applications.

Typical Use : temporary video links to provide live coverage of events

Assignment Priority : not applicable

Minimum Path Length : not specified

Antenna Requirements : 0.6 m standard parabolic dish

Notes:

1. Designated channel allocations for the major television networks on an Australia-wide basis are shown above. New assignments will not normally be made on these channels, see also notes 3 and 4.
2. The channelling arrangements shown above came into effect on 7 March 2005.
3. New and existing apparatus licensed assignments in all areas and with emissions in the frequency range 2500-2690 MHz shall be endorsed with Advisory Note BL, but see also notes 1 and 4 (Assignment Restrictions 1 and ref. 2).
4. New assignments of all types and in all areas and with emissions in the frequency range 2500-2690 MHz are embargoed (ref. 1).
