Dear [REDACTED]

Thank you for your email.

In response to your concern that foundation licensees are getting access to 'free benefits', I'd like to confirm that the new call sign arrangements do not grant foundation licensees access to a greater range of frequencies or additional power levels, and there have been no further changes to the [Radiocommunications Licence Conditions \(Amateur Licence\) Determination 2015](#) (Amateur LCD) since September 2019.

If you are aware of specific instances of licensees operating at power levels that exceed the allowances of the Amateur LCD, we would be receptive to receiving information, and would consider further action within the context of our compliance and enforcement priorities.

[REDACTED]

Thank you once again for your email, and kind regards.

Sean McQueen
Spectrum Licensing Policy

Who!! is going to Police this rational motion?

Already most F calls are running 100watts.

Do some thing about it.

More free benefits with no effort.
