Dear Sir/Madam,

I don't know why you bother asking for consultations as you have made a right mockery of current callsign allocation. Did you bother to think about now that any callsign is available to amateurs that you have opened up Pandora's Box. If a Foundation station wants to go on bad allocation that he or she is not entitled to. Who is going to police it? You have very few Radio Inspectors and unless you look up the stations qualifications you don't know anymore if they're pirating or not. So why bother consulting the Amateurs because i'll bet it gets stuffed up to.

Regards,

Michael
