TO ACMA

**Submission. re: extension of LPON spectrum 34**

I operate an information, advice and entertainment service for Seniors of the city of Castlemaine in Victoria and have done so since 2006. I have a small but loyal audience.

1/ I am unaware of any alternative broadcasting or non-broadcasting uses for the 87.5 – 88.00 Mhz.

2/ I firmly believe that a new section 34 be determined to extend the spectrum for service beyond December 31, 2025.

3/ An appropriate duration to be a minimum 10 years to provide some security to licence holders.

4/ I believe that a review could be conducted each decade.

Yours sincerely.
