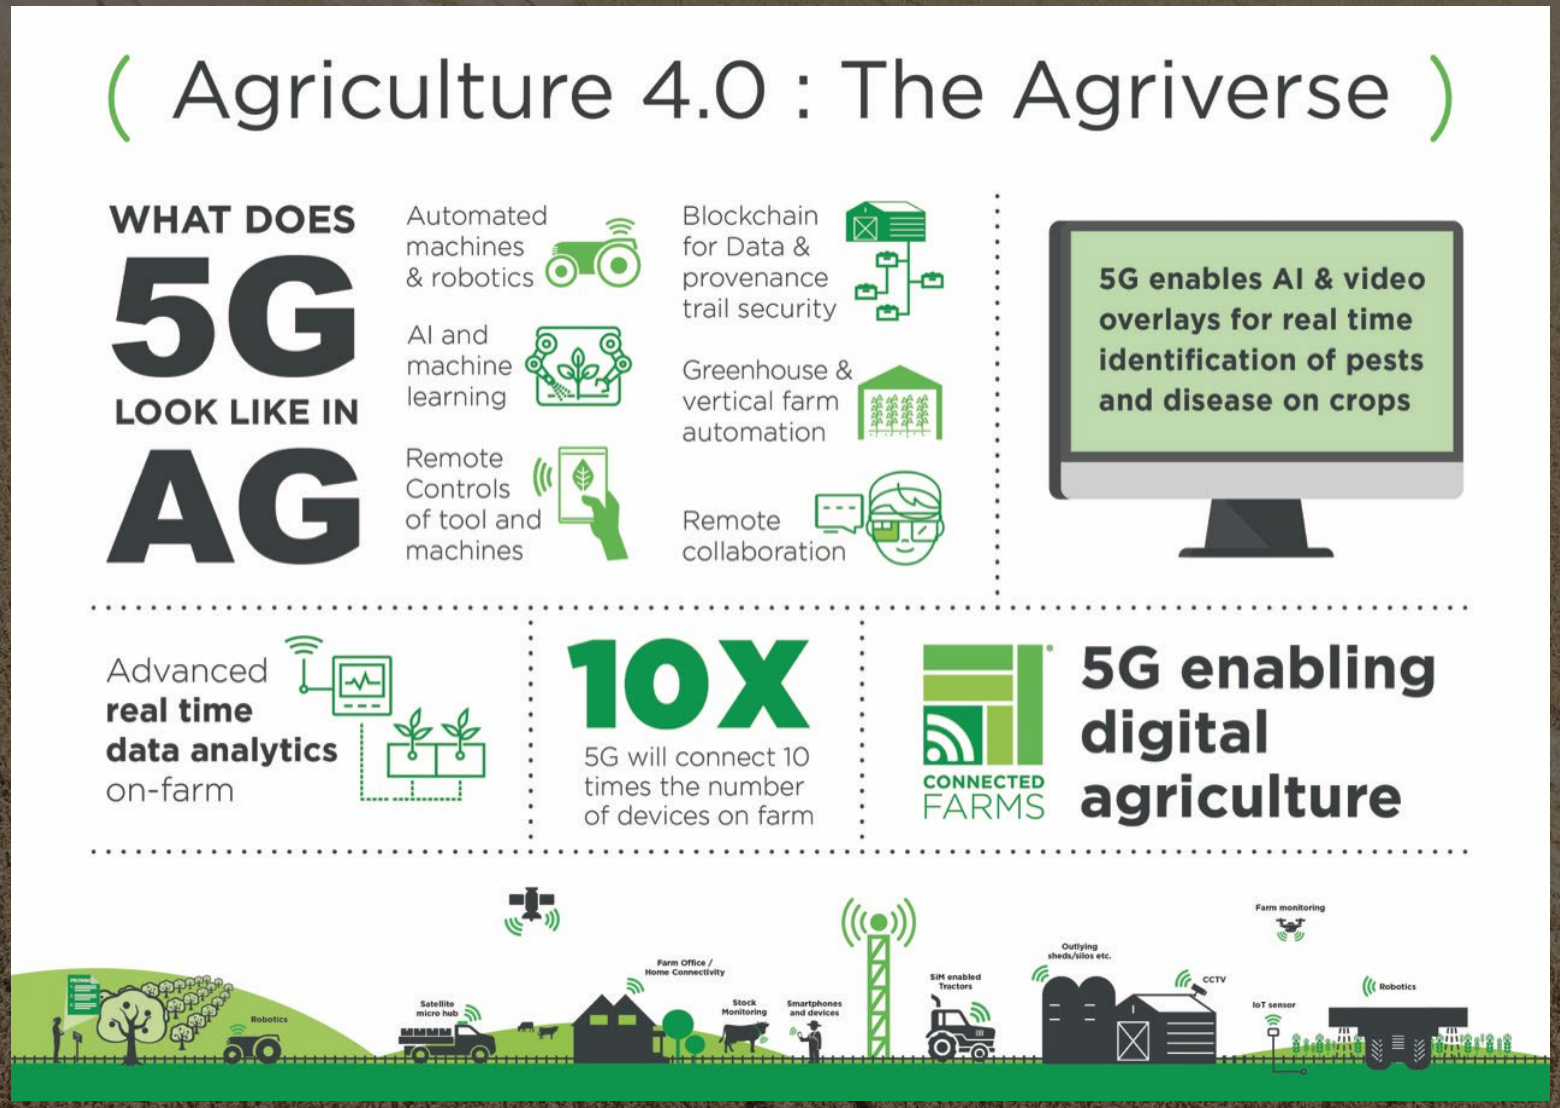
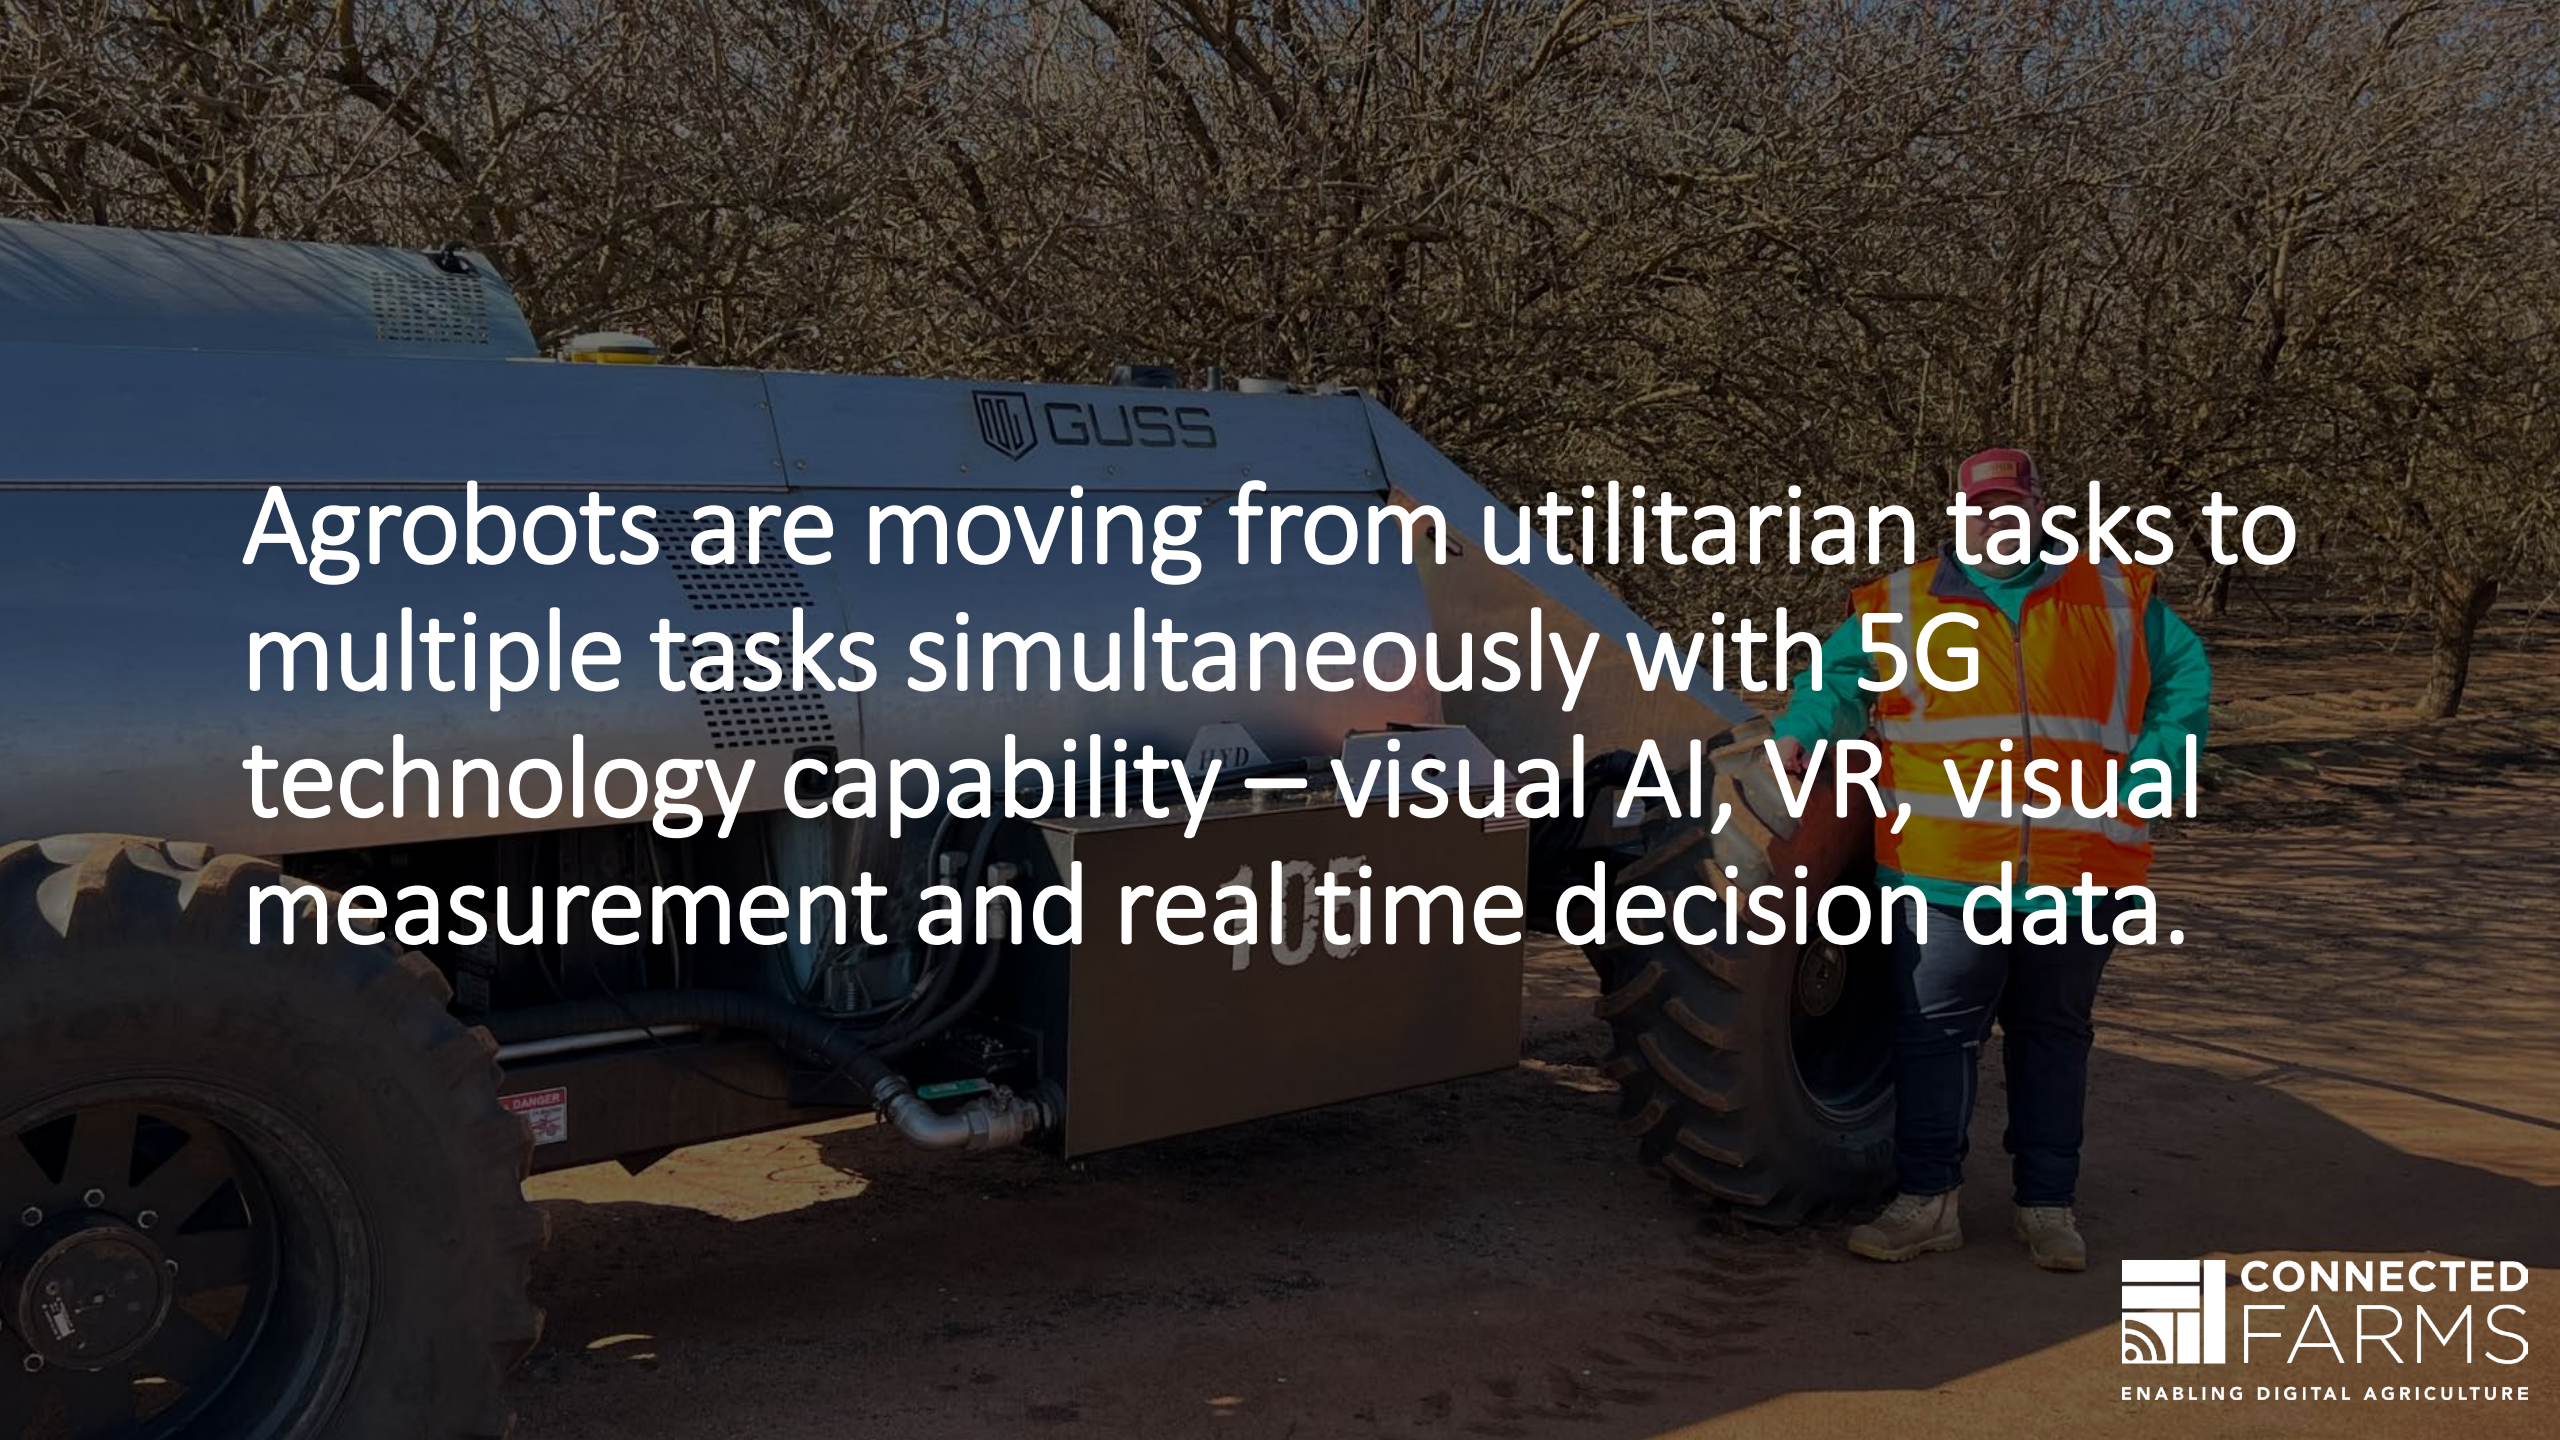
5G technologies and the Agriverse – what's coming?
CONNECTED FARMS
ENABLING DIGITAL AGRICULTURE

Agriculture 4.0: The Agriverse.



Agriculture 4.0 is about high-speed low latency connectivity.

CONNECTED FARMS
ENABLING DIGITAL AGRICULTURE



Agrobots are moving from utilitarian tasks to multiple tasks simultaneously with 5G technology capability – visual AI, VR, visual measurement and real time decision data.

What Connected Farms is doing with the Agriverse:

Partnering with V-Sight for remote collaboration, digital workflow on an AR platform.

Piloting various Agriverse technologies, applications and workflows on Ag Centres of Excellence and smart farms across QLD, NSW, Vic, and commencing a Vet AI telemedicine trial in NZ

Edge computing – establishing data centres to remotely collect, use analyse and exchange data in real time.
