Re: Replanning of the 1880 – 1920 MHz Band: Options Paper Consultation

17 March 2023

Dear Australian Communications and Media Authority,

Thank you for the opportunity for Sydney Trains to comment on the Replanning of the 1880 – 1920 MHz Band: Option Paper.

Sydney Trains has been closely working with the Australasian Railway Association (ARA) in the last few months of reviewing the option paper and the relevant inputs has been incorporated in the ARA submission.

As a result, Sydney Trains fully supports the ARA submission, especially for the Option 3 – the introduction of RMR in 1900 – 1910 MHz band spectrum Australia wide in addition to its current rail 1800MHz band spectrum. This will provide a range of benefits to all rail operators in Australia and extend the effectiveness to the public commuters where the infrastructure is available.

Sincerely,

Mia Zhang
