Have my say/ I'm a f call.. I'm 63 . I've been on cb radio over 40 years. I got a bit of disability. I know cb got 12 watt free license.. and amateur pay there license. We should have Moore power. 10 ok but not enough when someone you can hear but thay can't hear me. Depends on we're i am and propagation. And how many on that frequency. I like to have a 50 to 100 watt. We got the radio to run that power why not use it?. And there's other parts of the world running Moore power on the low class license. Thanks you're. This is my say. 73..
