**Subject:** Licence power amateur radio

I believe that's for decades past amateur radio licencees have been Far Underpowered in comparison to worldwide power standards....

My recommendation is a Kilowatt OUTput form a duly licenced advanced /full/amateur station..even at a kilowatt we would still be well behind but it would give duly licenced persons a whole new up to date [2022] outlook..

I ALSO highly recommend that Standard licencees upgrade to 500W OUTPUT..to keep proportions correct.

I Also highly recommend F class licencees be upgraded to 200 W INPUT thus correctly keeping proportion.. F call licencees buy amateur radio "Black Boxes" that give 200W input at point of sale.. I believe that piratye CB operators are using much higher the the F calls are..therefore NOT GIVING a person any REAL decision to go sit for a duly noted F licence..

Pirate radio will continually surge uncontrolled. MOST cb operators [including illegal powered ones] would love to become amateurs but are held back by 10W OUTPUT..you cant blame them for not wanting to go amateur radio when the ssb cb radios are 12+ W factory built OUTPUT...

Amateur radio in Australia is rapidly losing interest for decades because unrealistic power licencees ...

NOW 2022 its TIME to step up a few notches to almost bring us back into alignment with our world wide counterparts..

In honestly with F call conditions I can understand WHY theyre not prepared to do the study..cb gives more [just a little more but fact is its more,no lic required better power and a wide range of antennas..cbers have it better than F Calls..

Rod Marsh VK4EZY..god bless

**Subject:** Class licence amateur radio licences submission

I Rod Marsh would like to submit the interest of class licences for EVERY licence Amateur. Start immediately [2022]..Also outpost licences Should be class [free] theyre specific licences but its time australia came out of the dark ages... even CB Radio has been Class licence for decades..why are amateurs one of the few remaining [outpost too] denied class free licence..

These days since covid EVERYONE is struggling just to make ends meet...I believe it time australia gave its amateur and outpost class licences..we struggled enough its time the government acted in the interests of licencees now..

Class licence privilages to EVERY licence level amateur and outpost..
