Dear [REDACTED],

Thank you for responding to the ACMA.

We are pleased to report that your neighbour has not experienced any interference to their TV reception for several weeks.

As it appears that this issue is now resolved, the ACMA is closing this matter with no further action required at this stage.

We thank you again for your cooperation in this matter.

Regards,

Shane [REDACTED]

Good Morning Julie,

REF: Warning Notice - Domestic Television Service Interference - REF:ACMA2021/161-14

I am writing in response to your letter dated 1st October 2021.

As you have noted in your letter, i spoke with Stephen on the 26th of July regarding my electric fence allegedly causing my neighbour to have television interference. As Stephen stated in that phone conversation i was to get a am/fm radio (which i purchased) and walk the fence with the radio while it was on an AM station, while walking if the fence had any interference it would come through as static on the radio.

I completed this on the [REDACTED] as advised, an no static or interference was found. [REDACTED]

[REDACTED] As a gesture of good will, I replaced all the electric fencing on my property on the [REDACTED] and again walked the fence line with the radio and again no radio interference/static. So according to Stephen's instructions my fence is NOT causing any interference.

I spoke with my neighbour on the night of the [REDACTED] and advised her that I had replaced all the fence and if she had any interference could she please advise me so we could work this out together and come up with a solution. I have offered to pay for a technician to inspect their television cabling also.

My neighbour rang me twice on the [REDACTED] to ask if I had my fence on as she has all television channels and no interference. to which I replied yes. The fence was left on until the [REDACTED] when I rang her [REDACTED] to see how everything was and she stated that she had interference on the night of the [REDACTED]. If this was the case, why did she not ring and advise me. I have advised for the fence to be turned off [REDACTED].

Could you please explain how my fence can have no interference with anything on my property but does on my neighbours?

As stated above I have offered to pay for a technician to attend their property but am yet to hear of their acceptance on this offer. Does this not count towards finding a solution.

As your letter is dated the 1st of October, and states that they have had further television interference, I am wondering how this is possible since my electric fence has not been utilized since the [REDACTED].

If you would like to send an ACMA inspector out to my property so we can both go through this face to face, I would welcome a visit on my next break home which will be from the [REDACTED] [REDACTED] to the [REDACTED]. I have included my mobile number below should anyone wish to contact me .

Kind Regards

[REDACTED]
