PIPE International (Australia) Pty Ltd

Attn: [REDACTED]

Dear [REDACTED]

### **PIPE International (Australia) Pty Ltd – Further Information Required**

Further to your conversation with my colleague [REDACTED] this afternoon, the Australian Communications Media Authority (AMCA) is unable to complete the processing PIPE's application for a permit to install the proposed Sydney – Guam submarine cable in the Northern Sydney Protection Zone and the accompanying application for a permit to install the cable in Australian waters (other than in a protection zone or coastal waters) until the remaining crossing information is provided. ACMA is therefore formally suspending consideration of both of PIPE's permit applications until the outstanding information is provided.

Please provide this information to [REDACTED] (ph: [REDACTED], email: [REDACTED]) by **29 March 2008**.

Yours sincerely

[REDACTED]
